UKRENERGY project

Overview

Project aims: to establish and implement new Master Courses on "Energy Efficiency, Building Retrofitting and Energy Planning" in Ukrainian Universities; to promote best practices in the terms of educational methodologies and specific knowledge related to the energy efficiency and sustainability of buildings. Three are the specific objectives:

1. Curricular development tailored to labour market requirements and enable to support the employability expectations of graduates by training them with up-to-date methodologies in the field of energy sustainable buildings. The new study programmes (SPs) will be implemented with different training directions according to the local needs. SPs will start in the 3rd project year with the completion of the 1st academic year. The development process will be completed by updating of didactical laboratories and new teaching aids materials to publish jointly between UA and EU teachers.

2. Links university-enterprises: to develop a networking system among Ukrainian Universities and stakeholders to remedy to the currently fragmented scientific background in Energy Efficiency and Sustainability and to the lack of distribution of knowledge, expertise, info and data.

3. An "EU - Ukraine Green Deal Network" will be officially established, to enhance in tangible and actual terms the leading role of Higher Education Institutions in policies related to Energy Efficient and Sustainable Buildings, keeping into due account both the requirements set by UN 2030 Agenda. UKRENERGY will also spread and promote UA awareness related to the EU policies referred to Sustainable and Energy Efficient Buildings and to enhance the approach towards EU best practices.

Main beneficiaries of the outputs will be UA Sr. teaching and Jr. teachers and assistants, final year students / new graduates and students to enrol to the new Master Courses.

KOM expected results

- Partners have a clear understanding of the project expectations
- Partners get to know each other better to ensure a smooth project implementation
- Partners understand project work-plan and organization
- Partners discuss work-packages and deliverables expected
- Develop short-term specific action
- Explore administrative / financial reporting

Study Visit expected results

- Ukrainian Universities have an understanding on how to develop the new Master Study Programme in the framework of their teaching offer
- Ukrainian Universities have an understanding on how to exploit the Member States' Universities expertise and consolidated academic background
